Course Outline

This is an immersive 3-day masterclass designed for dental professionals seeking to enhance their implantology skills through a focused and clinically relevant approach.

Delegates will progress from diagnosis and planning to live surgery and restorative techniques, ensuring a comprehensive understanding of the full implant workflow for full arch same day implants.

- **Day 1** : Clinical Assessment & Treatment Planning
- **Day 2** : Surgical Implant Placement
- **Day 3** : Restorative Phase & Maintenance

Day 1 Outline

Clinical Assessment & Treatment Planning

Focus: Diagnosis, Patient Selection & Digital Planning

- Full patient assessments including CBCT analysis and periodontal evaluation
- Principles of case selection and risk management
- Digital workflow: implant planning software demonstration
- Implant design, bone biology & healing phases overview
- Discussion of prosthetically driven implant placement
- Hands-on exercises in virtual planning and stent fabrication

Delegates will confidently be able to assess patients for implant placement, interpret radiographic findings, and develop treatment plans incorporating both surgical and restorative elements.

Live Surgery Case

With Lecturer:

**Dr Ali
Altaf**

Day 2 Outline

Surgical Implant Placement

Focus: Surgical Technique & Implant Placement

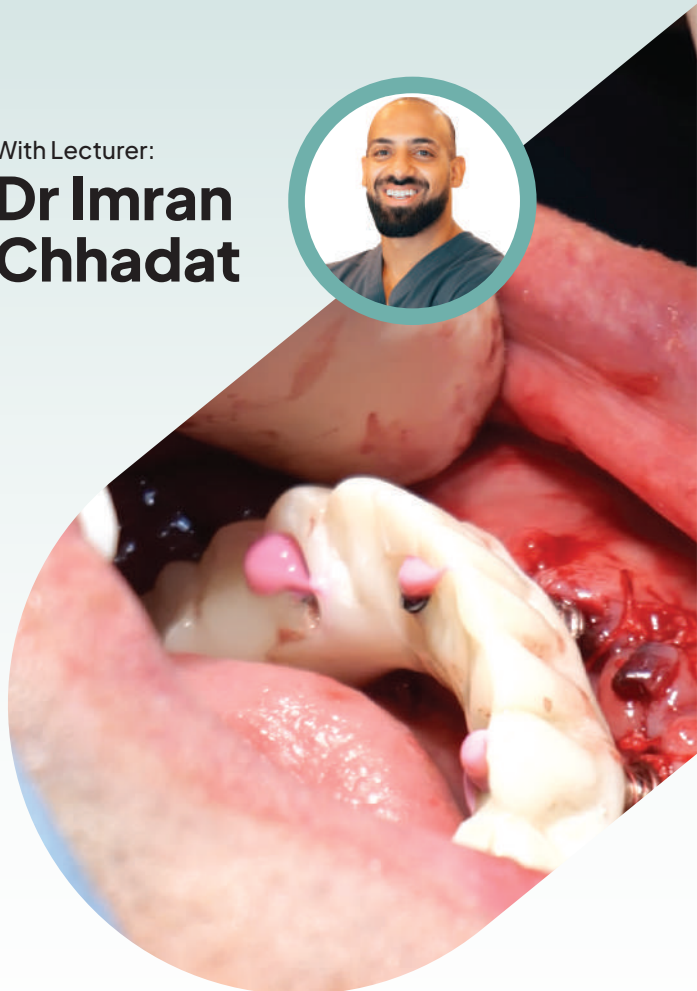

- Aseptic technique, instrumentation and surgical protocols
- Step-by-step implant placement under direct supervision
- Flap design, bone management, and soft tissue handling
- Immediate vs delayed placement: decision-making in surgery
- Suturing techniques and post-op management

Delegates will observe live surgery experience in placing dental implants enhancing confidence in surgical technique and safety protocols.

Live Surgery Case

With Lecturer:

Dr Imran Chhadat

Day 3 Outline

Restorative Phase & Maintenance

Focus: Surgical Technique & Implant Placement on Live Patients

- Impression techniques for implants (open/closed tray methods)
- Abutment selection, screw vs cement-retained restorations
- Occlusal considerations in implant restorations
- Chairside and lab communication tips
- Maintenance protocols and management of complications
- Hands-on with restorative kits and crown placement on models
- Final review and Q&A

Delegates will be proficient in restoring implants, with clear understanding of both aesthetic and functional outcomes, as well as long-term maintenance strategies.

Live Surgery Case

With Lecturer:

Dr Karim Rachidi

Certification & CPD

- Accredited Certificate of Completion
- 21 CPD Hours (7hrs per day)
- Suitable for dentists with basic implant experience or those wishing to refresh and consolidate their knowledge in a structured and supportive environment

Pricing

- Digital Only - **£1000 + VAT**
- Comprehensive - **£2500 + VAT**
